ASVF Series Irrigation Valve

The valve that delivers the ultimate in performance and reliability from a trusted industry source.

With over 20 years of safe, reliable performance, the ASVF anti-siphon valve with flow control is chosen more often by professionals than any other residential/light commercial anti-siphon valve on the market.

Built-in atmospheric backflow prevention in the ASVF assures that your drinking water is safe from irrigation water flowing back into your drinking water supply.

The Rain Bird ASVF valve provides problem-free operation so you’ll spend less time thinking about your irrigation system and more time enjoying your landscape.

Premium
The first choice of industry leaders worldwide is also a great choice for your landscape.

Reliable
Over 20 years of proven performance for peace of mind.

Safe
Prevents irrigation contamination of your drinking water supply.
